

ADP DISTRIBUTION BY FACILITY TYPE

The "Average Daily Population" (ADP) of the DOC was 30,801. * ADP is the sum total of the offender population resulting from periodic head-counts divided by the number of observations. There are four basic types of DOC facilities - major institutions, field units, work centers, and community facilities - but there are differences between individual facilities within each type. The offender's security risk (6 security risk levels, Level 1 being the lowest and Level 6 being the highest), health care needs, educational needs, age, area of residence, etc. determine where an offender is housed. (NOTE: Only a court of law can decide whether an offender can be placed in a community facility.)

ADP DISTRIBUTION BY FACILITY TYPE - FY 2002

FACILITY TYPE	FY 2002	FY 2001
Major Institutions	25,856	25,289
Field Units	2,923	2,758
Community Corrections Facilities	1,007	1,038
Work Centers	1,015	1,012
	30,801	30,097

* The above ADP statistics refer to offenders housed in facilities operated by DOC. Excluded from these statistics are 1,573 DOC inmates housed in a privately-operated prison in Lawrenceville.
